Overview:

In this meeting we showed each other our prototypes for the user interface with each of us attempting to bring up negative issues in the work produced. This led to us coming to a conclusion of what would be the ideal interface from the ideas we came up with. It was also decided we would need to come up with Use Cases for the prototype along with more detailed analysis for each prototype to be put on the team website.

TOPICS OF DISCUSSION

1. Evaluating prototypes produced
 - Finding issues with each prototype
 - Decisions made on what was ideal for the job at hand
2. Further analysis that shall be required
 - Use Cases to be produced
 - Detailed analysis on each of the prototypes

FURTHER ACTIONS

Simple HTML template produced for the UI with all prototypes merged into one.
